

ELDAR MUTALLIMOV

Baku, Azerbaijan | 051-384-56-68 | mutellimoveldar7@gmail.com | LinkedIn | GitHub

SUMMARY

Computer Science student seeking an internship or entry-level role in software development, data, or technology-related fields. Skilled in Python, C, JavaScript, SQL, MySQL, and MongoDB, with academic project experience in databases, web applications, and problem-solving. Strong foundation in algorithms, data structures, object-oriented programming, and computer systems. Eager to apply technical skills, learn in a professional environment, and contribute to real-world projects.

EDUCATION

French-Azerbaijani University (UFAZ) - B.S. in Computer Science

Baku, Azerbaijan | Expected Graduation: Jun 2028 | Current GPA: 4.0/4.0

Relevant Coursework: Database Systems, Object-Oriented Programming, Network Algorithms, Computer Architecture, Cryptography

PROJECTS & ACTIVITIES

AI-Powered Vehicle Detection & Speed Estimation System (Python, YOLOv8n, OpenCV) | GitHub

- Developed a Python-based computer vision project using YOLOv8n to detect vehicles in video input and visualize detection
- Implemented a speed estimation approach using bounding-box measurements, frame differences, and smoothing to reduce detection noise.
- Used OpenCV, Ultralytics, and NumPy to process video frames, run object detection, and generate annotated output for traffic monitoring.

To-Do List Database Application (MySQL, MongoDB)

Individual Academic Project

- Built a to-do list application with 5+ core task-management features, including task creation, editing, deletion, retrieval, and status updates, with data stored in MySQL and MongoDB.
- Designed relational tables and MongoDB collections to implement CRUD operations and compare SQL and NoSQL storage approaches for task data.

GPA Calculator (HTML, CSS, JavaScript)

Sep 2025

<https://l1-s1-gpa-calculator.netlify.app>

- Built an interactive web application to calculate semester and cumulative GPA from grades and credits, using JavaScript validation and error handling to improve calculation accuracy.

Snake Game in C with OpenGL

Apr 2025

https://github.com/mutallimov7/Snake-game/blob/main/Snake_game.c

- Developed a classic 2D Snake Game in C using OpenGL (GLUT), implementing a real-time game loop, collision detection, and linked-list-based snake growth.

Data Structures & Algorithms - CodeStar

Jul 2025

- Completed a course covering fundamental data structures and algorithmic problem-solving techniques.

CERTIFICATIONS & COMPETITIONS

- CanYouHack CTF Competition:** Completed challenges in cryptography, reverse engineering, OSINT, and web security.
- ICPC Azerbaijan 2026 - Qualification Round:** Participated in an algorithmic problem-solving qualification round.
- IDEALISE 2 Incubation Program:** Took part in a hackathon-style incubation program involving team collaboration, project development, and idea presentation.
- IYMC Math Challenge 2025:** Participated in an international mathematics challenge focused on logic and problem-solving.
- IYMC Math Challenge 2025 - Pre-Final Round:** Advanced to the pre-final round.

SKILLS

- Programming:** Python, C, C++, Java, HTML, CSS, JavaScript.
- Databases:** MySQL, MongoDB, SQL queries, CRUD operations, data modeling.
- Tools:** GitHub, OpenGL/GLUT, Git, Excel, Data Entry, Web Research, Google Sheets.
- Competencies:** Algorithms, data structures, problem-solving, probability and statistics, AI tools, data cleaning, data transformation, data labeling, data analysis.

LANGUAGES

- Azerbaijani (Native).
- Turkish (C1).
- English (B2).
- Russian (A2).
- French (A2).

AWARDS & HONORS

- 3rd place - History Competition (Team), Regional Round, 2023.
- 1st place - "Zafarin Fatehlari" Competition, Regional Round, May 2024.
- Bronze Honor | International Youth Math Challenge 2025.
